

AMOSTM

Maritime Asset Management Software.

Built to Scale with Your Fleet.

**Powerful asset management,
powered by people.**

AMOS is maritime asset management software built specifically for shipowners, operators, and fleet managers who require structured control across maintenance, inventory, procurement, compliance, performance, and governance.

One unified platform.
Built for every stage of operational maturity.
Designed to scale.

Control

Standardise

Govern

Three tiers. One platform. No replatforming as you grow.

One Platform. Complete Maritime Capability.

AMOS maritime asset management software supports the full operational lifecycle of modern fleet operations - from a single growing vessel to a complex global group spanning multiple entities, regions, and regulatory regimes.

Configured by Operational Maturity

AMOS is deployed as a single unified platform, with capability depth unlocked through three tiers aligned to your operational stage. The system remains the same - your configuration evolves with your needs.

Core capability spans:

-  **Maintenance**
-  **Inventory**
-  **Procurement**
-  **HSEQ**
-  **Performance Analytics**
-  **Enterprise Governance**

All operating within one database.
One operating model.
One scalable architecture.

No bolt-ons. No disconnected modules.
No system replacement as you grow.

AMOS™ Gateway

Structured operational control for growing fleets

- Planned, visible maintenance
- Controlled purchasing workflows
- Real-time spare parts transparency
- Stronger audit readiness

AMOS™ Horizon

Fleet-wide standardisation and performance for scaling operations

- Standardised workflows across vessels
- Fleet-wide comparison dashboards
- Measurable performance benchmarking
- Predictable compliance outcomes

AMOS™ Enterprise

Governance, assurance, and executive control for complex global organisations

- Enterprise-wide policy enforcement
- Executive dashboards linking risk and performance
- Continuous audit readiness
- Embedded governance across fleets and regions

From Manual Coordination to Governed Performance

Whatever your starting point, AMOS supports the journey from reactive coordination to structured, governed, and continuously optimised fleet operations.

Before AMOS™

- Maintenance tracked in spreadsheets and reminders
- Procurement managed through email chains
- Spare parts visibility inconsistent across vessels
- Fleet performance impossible to compare
- Audit preparation time-intensive and manual
- Governance reliant on periodic reports

After AMOS™

- Planned, scheduled maintenance with full audit trail
- Integrated, controlled purchasing workflows
- Real-time stock visibility across the fleet
- Standardised KPIs benchmarked fleet-wide
- Continuous, digital audit readiness
- Policies enforced system-wide in real time

Trusted by Maritime Operators Worldwide

AMOS supports fleets across commercial shipping, offshore, ferries, naval support, and specialised maritime operations - deployed across thousands of vessels globally, with regional delivery and support teams positioned to ensure local responsiveness and global consistency.

**Supporting operators across
Europe, Asia-Pacific, the Americas,
and the Middle East.**

Registered and Recognised

AMOS is registered and approved by leading classification societies, supporting compliance as an embedded part of daily operational workflows - not as an add-on or inspection-time activity.

**Recognised by leading classification
societies including:**

ABS

DNV

Lloyd's Register

Bureau Veritas

ClassNK

RINA

CCS

and other major regulatory bodies

Built to support Class, Flag, and statutory requirements as part of daily operations. When compliance is embedded by design, inspections and audits become confirmation of practice - not a separate workstream.

SpecTec

Built for the People Running Your Fleet

AMOS is designed for every stakeholder across ship and shore - from executive teams requiring assurance to crews needing systems that simplify their daily work.

Executives & Board

Strategic visibility starts here.

- Fleet-wide performance, risk, and compliance in one governed view.
- Confidence grounded in operational data - not periodic reports.

Fleet & Technical Managers

Plan work. Don't chase it.

- Structured maintenance scheduling. Linked spares and work orders.
- Standardised workflows benchmarked across vessels and fleets.

Procurement & Commercial

Control spend. Govern supply.

- Maintenance-driven demand planning. Controlled approvals.
- Supplier performance visibility. Financial discipline through data.

Ship & Shore Users

Systems that simplify - not complicate.

- Clear task lists. Mobile-first execution. Offline sync.
- One consistent way of working across every vessel.

Deployed to Match Your Strategy

AMOS is available across a range of commercial and deployment models to match your organisation's structure and IT strategy:

Commercial Flexibility

- Capital expenditure (CapEx)
- Operational expenditure (OpEx)
- Subscription-based licensing

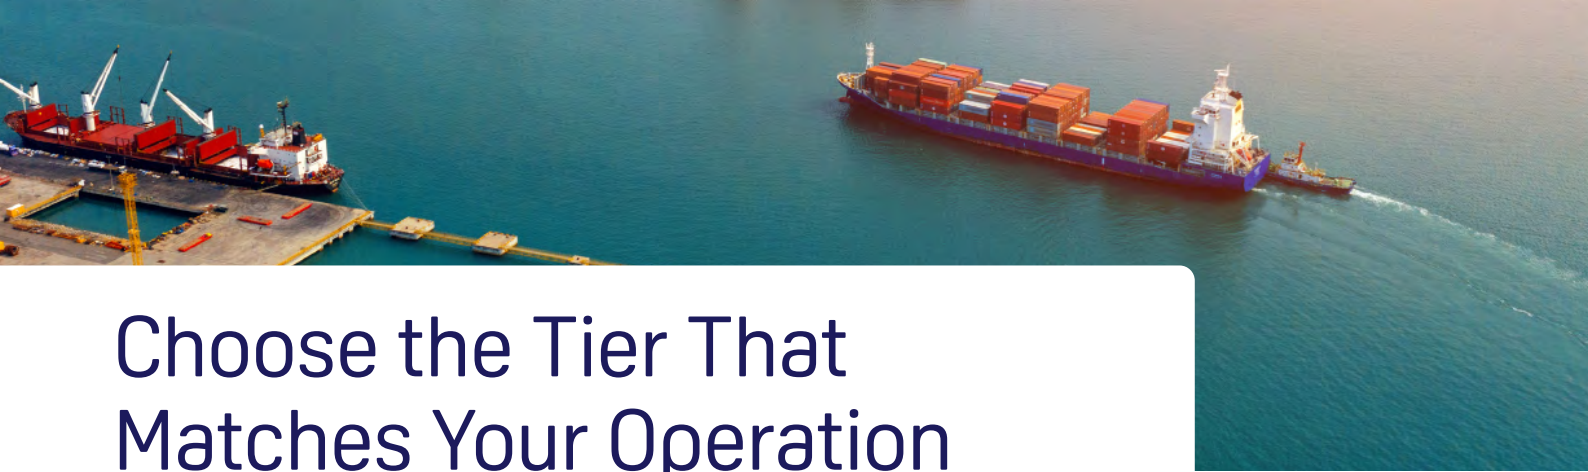

Deployment Flexibility

- On-premise hosting
- SpecTec-managed cloud hosting
- Hybrid deployment

Choose the Tier That Matches Your Operation

AMOS is configured to match where you are today - and scales with you as your fleet and operational complexity grow. All three tiers operate on the same unified platform; no migration, no replacement, no disruption.

AMOS™ Gateway

Is this you?

You're growing and need structure.

- Maintenance is tracked in spreadsheets or offline
- Procurement runs through email with limited visibility
- You need audit-ready documentation without heavy IT overhead

What AMOS delivers:

Structured operational control - maintenance, inventory, and procurement in one system.

AMOS™ Horizon

Is this you?

You're scaling and need consistency.

- You manage multiple vessels and performance varies between them
- You can't easily compare compliance or backlog across the fleet
- Leadership needs fleet-wide data, not vessel-by-vessel reports

What AMOS delivers:

Fleet-wide standardisation, benchmarking, and measurable performance improvement.

AMOS™ Enterprise

Is this you?

You operate at scale and need governance.

- You manage multiple entities, regions, or business units
- Policy consistency and board-level assurance are non-negotiable
- Audit readiness and compliance must be continuous, not periodic

What AMOS delivers:

Embedded governance, executive oversight, and policy enforcement across your entire organisation.

What You'll Achieve with AMOS

✓ **Reduced unplanned downtime**

✓ **Improved crew efficiency**

✓ **Stronger compliance confidence**

✓ **Greater operational consistency across vessels**

✓ **Clear visibility from ship to shore**

✓ **Structured, auditable operational execution**

✓ **Board-level assurance from real-time data**

✓ **Governance that scales with your fleet**
